

Addnode Group acquires Railit in Sweden

Addnode Group announces today that it has acquired Railit Tracker AB (Railit), a SaaS company that strengthens the group's position in travel and public transport. Railit is based in Stockholm, Sweden, and has net sales of SEK 14 m.

Railit has extensive experience in the railway industry and offers innovative SaaS solutions that facilitate planning work and make train operations more efficient. Customers include Arlanda Express, Nordiska Tåg, Snälltåget, the Swedish Transport Administration and VR.

"Within Addnode Group, we have a broad offering linked to travel and public transport, so it is therefore very exciting to now be able to complement it with Railit's products. I look forward to continuing to grow and develop our offering in this area together with Railit," says Andreas Wikholm, Division President Process Management, Addnode Group.

Railit will be consolidated from February 2025 as part of Addnode Group's division Process Management.
